Projects

EventXplorer:
It's a web application that allows the user to organize and search for events of any type quickly and easily.

CineFarixi:
It's a web application that allows the user to search for their favorite movie through a movie listing and thus be able to create their own movie playlist.

TastyPoint:
It's a mobile app that is aimed at consumers and restaurants. It offers food delivery service with the aim of reducing the percentage of discarded food in Peru.

LimaMap:
It's a useful app for planning trips in Lima, giving users the ability to find optimal routes that reduce the length between one point to another.
